

Study design: harmonization methods and evaluation

C Harmonization methods

ordered by modeled vendor components

D Evaluation framework

three orthogonal endpoints

	Vendor removal	$\eta^2 \cdot \text{ICC} \cdot \text{PERMANOVA } R^2$
	Biology recovery	$\text{age } R^2 \cdot \text{sex } R^2$
	Subject preservation	within-vendor $r_{\text{pre, post}}$
